DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, Claims 1-13 in the reply filed on 3/22/2007 is acknowledged. Therefore, non-elected claims 14-18 are withdrawn from further consideration. Applicant did not provide any reason as why to the restriction is improper, the election has been treated as an election **without traverse** (MPEP§813.03(a)).

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3,6-10 of copending Application No.10/284,519. They are not patentably distinct from each other because they recite the same subject matters as following: a first elongated member having a handle end portion, a working tip portion, a box hinge portion between the handle and tip end portions, a second elongated member having a handle end portion, a working tip portion, a box hinge portion between the handle and tip end portions, the first box hinge portion defined by a slot, a second box hinge portion is continuous in width with the handle and tip portions on either side of

Art Unit: 3734

the box hinge portion. As to claims 4,7-13 are not patentably distinct from each other because they are essentially the same as those in the cited copending application No. 10/284,519.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
